

June - 2013

- **Whelks** - Laboratory analysis underway processing whelks to look at male: female ratio, size and maturity.
- **Finfish** - Trials underway to investigate the possibility of using blood samples from Sea bass to look at sex and maturity through hormones. [Please see our Facebook page for photos.](#)
- **Questionnaire** - Fishers' knowledge questionnaire now back from the software developers at [Exegesis Spatial Data Management](#). Staff training underway on its use.
- **Crustacea** - Lobster tagging underway. Over 100 already tagged with many thanks to the help of fishers. Survival of tagged lobsters being monitored in holding tanks at the [Lobster Pot, Anglesey](#). Thanks for your help!
