

May - 2013

- **Facebook** - follow the link below the fisheries & conservation science team logo on the left of the page to find our Facebook page.
- **Whelks** - Please help us to gather data on whelk fisheries by fishing with a scientific pot and taking part in our whelk tagging study! [Click here.](#)
- **Scallopers** - We are asking scallopers to help us to collect samples of berried Brown crab. To find out more [click here.](#)
- **Finfish** - Sampling packs have been handed out to bass fishers across Wales. A total of 12 kits have been handed out to commercial and recreational bass fishers. This includes scale collection envelopes, tubes to collect fin clips, and bags for guts and gonads. To find out more [click here.](#)
- **Questionnaire** – A fishers’ knowledge questionnaire was developed to obtain information from fishers regarding fishing activity. A paper version of the questionnaire was trialled on three fishers with different fishing activities. This is now with the software developers at [Exegesis Spatial Data Management](#) and will be completed by 17 May 2013.
- **Crustacea** – On-board camera trials underway with lots of fishers signed up. Numbers are low for Anglesey so if you are a pot fisher please get involved! [Click here.](#)
Lobster tagging study to begin soon. To find out more [click here.](#)
Please help us to collect and tag berried hens! [Click here.](#)
Fish with a scientific pot! [Click here.](#)
Flying array under trial to film lobster habitats. To find out more [click here.](#)
