

October - 2013

- Economic interviews underway. Thanks to all those who have taken part so far. Please contact [Giulia](#) if to join in.
- Another MSc thesis completed with us this summer now available here: Nikki Heraghty looked at the [abundance and distribution of *Cancer pagurus*](#) around Anglesey and the Llŷn Peninsula.
- Our request to undertake the Cardigan Bay scallop fishing intensity study has been submitted to the Welsh Government and NRW. The study would examine the impacts on the seabed of different intensities of scallop dredging and recovery rates of benthic fauna. [View the plan.](#)

- [Isle of Man queenie exports reach £3million mark.](#)
- Take a look at the MSc theses completed with us this summer. Claire Grenfell looked at the [abundance and spatial distribution of *Palaemon serratus*](#) in South Wales. James Albreicht looked at the [recovery of the seabed inside and outside the SAC](#) in Cardigan Bay.
